Prérequis sur cette formation :	None
Public ciblé :	Université de Bordeaux staff and site/PUI partners
Public prioritaire :	
Date limite d'inscription :	14/10/2025

Objectifs :

Creativity is a key skill when problem-solving.

Develop your convergent and divergent thinking by building a toolkit of practical exercises to help you innovate at work and in job applications.

Ever wanted to be more creative? If so, this training is the perfect starting point.

From financial planning to garden design, home decoration to meal planning, you already draw on your creativity to help you problem-solve almost every day.

But how can you do this more effectively at work?

This training will guide you through a self-assessment of your current creativity to discover your strengths and weaknesses. Then, through a range of practical exercises, you'll learn how to generate ideas using divergent thinking and select the best ones using convergent thinking.

You'll also apply these skills to real problems at work, nurture your creative mind; discover ways of building confidence when sharing your ideas, and pick up invaluable techniques to help you work creatively with others.

By the end of this training, you will be able to:

-

Explore practical techniques to nurture your creative capacity.

-

Apply divergent and convergent thinking to hone your creativity.

-

Apply creative thinking tools to problem-solve in the working world.

This training receives government funding managed by the Agence Nationale de la Recherche (National Agency for Research) under the plan France 2030, with the reference ANR-21-EXES-0004.

Programme :

Part 1: Explore Practical Techniques to Nurture Your Creative Capacity
